

ENACTUS, ST STEPHEN'S **COLLEGE**

Enactus is an international non-profit organization that brings together student, academic, and business leaders who are committed to using entrepreneurial action to improve the quality of life and standard of living for people in need. The word "**Enactus**" stands for "**Entrepreneurial, Action, Us**" and reflects the organization's focus on entrepreneurial approaches to address social, economic, and environmental challenges.

In Enactus, we create sustainable impact, and drive social progress. These projects often involve innovative business solutions, financial literacy education, environmental sustainability initiatives, and more. Enactus competitions provide a platform for teams to showcase their projects, share their impact stories, and compete at regional, national, and international levels.

We are a community of college students with **a head for business and a heart for the world**. We are committed to achieving our goal of creating meaningful progress towards achieving the Global Goals through sustainable smart business solutions.

5.	Events, Talks, workshop	-	Annually	Online/offline
6.	Bussoc'23	Annual Event	March 2023	Offline

Enactus Project Trishna

Enactus, St. Stephen's College took up Project Trishna -which involves the production of low-cost water filters made using sustainable material- in an attempt

to uplift the poor communities in areas affected by the water crisis by helping them achieve a healthier living state.

We researched the ongoing water crisis in India and how it is affecting people, with a special focus on Delhi- NCR regions.

We identified the target regions facing a severe water crisis and set up our target community accordingly.

- We researched the specific ratios of silver, clay and dust used to make the model.
- We reached out to the potter community for the production of our prototype.
- We made 5 water filters containing different ratios of silver and clay to test for efficiency.
- We contacted governmental and private laboratories to test our filtered water sample.
- Our team undertook a **field visit in October 2021** to the **Delhi Jal Board** where research and understanding of the process of testing were undertaken. A careful analysis of the costs involved was also done so that we could figure out the costs as per our needs and requirements.
- The filtered samples are now in the process of testing.

Enactus Project Nuri

Enactus, St. Stephen's College took up Project Nuri-which involved the production of pickles

and other preservatives - in an attempt to uplift the poor communities, especially old age women by helping them achieve an economically better-living state.

We managed to achieve the following through the means of our initiative:

- Proper ideation and appropriate research and testing related to the raw material and their ratio used were carried out.
- Target communities were approached to set up the project.
- A list of potential NGOs along with the proposal is ready.

- Plan of action- these NGOs will soon be contacted with our project proposal and will start developing the project business plan with the NGO that is ready to collaborate with us.
- We aim to create a self-sustainable business model with the NGO to establish a circular income flow model with our target community.
- The initial support in form of capital and other professional support will be provided by team Enactus, St. Stephen's College till the project reaches the self-sustainable level.

Project Chirag

Enactus, St. Stephen's College, organized Project Chirag in October'22. On the occasion of Diwali, Enactus decided to bring smiles to the women of the potter

community by incentivizing their work as we bought diyas in bulk and conducted a diya painting event in the SCR lawns.

The event was held in collaboration with **The Fine Arts Society** of our college.

More than 100 students turned up to paint these diyas. Songs were played while people sat and painted the diyas together with their friends enjoying the festive vibe. The event brought together students in a colorful display of talent and camaraderie. The air buzzed with excitement as participants adorned plain clay diyas with intricate designs, vibrant colors, and imaginative patterns, transforming them into exquisite pieces of art. These diyas were sourced from a local community of talented yet underprivileged women potters which not only empowered these women economically but also infused our event with a profound sense of social responsibility and empathy. The collaboration aimed to support these skilled artisans, providing them with a platform to showcase their craftsmanship and earn a sustainable income for their families.

Moreover, Enactus sold Diwali home décor made from waste milk bottles.

This unique partnership transformed the event into a celebration not just of art and culture but also of compassion and solidarity, leaving an indelible mark on the hearts of everyone involved.

It was a very wholesome and memorable event for everyone.

Bussoc: Panel Discussion

Bussoc, the annual flagship event of Enactus, included a Panel Discussion which was held on 3rd April 2023. The event was held in the College Hall from 2pm onwards. The panel discussion included **Sharad Vivek Sagar** (founder and CEO of Dexterity Global), **Aakriti Rawal** (CO-founder and CEO of House of Chikankari) and **Rohit Nandwani** (Founder of Hammer Lifestyle)

The panel discussion was expertly moderated by **Hiteshwar Sharma**, Enactus executive council member, who skillfully guided the conversation, ensuring a

productive and engaging discussion.

The theme of the Panel Discussion was **“Why are entrepreneurs doubling down on social impact?”**

The event, organized with the aim of providing valuable insights to aspiring entrepreneurs, witnessed an enthusiastic participation of over 80 attendees from different colleges as it was an open event.

The Panel Discussion was initiated with an introduction from each speaker. The panelists shared their personal experiences, providing valuable insights and practical strategies to navigate the complex entrepreneurial landscape. Attendees actively participated, asking insightful questions and engaging in meaningful discussions.

The panel discussion on entrepreneurship proved to be a resounding success, providing attendees with valuable insights, actionable strategies, and inspiration to embark on their entrepreneurial journeys. The event not only educated but also empowered the attendees, equipping them with the knowledge and confidence needed to navigate the challenges of entrepreneurship. The event was concluded with a vote of thanks to all the speakers and a group photograph of the council and the speakers.

Bussoc: Potenza (Product Innovation and Design Challenge)

Enactus, St. Stephen's College held its third Bussoc 2023 from 3rd to 5th April.

- The participants were presented with a project that they had to analyze using their problem-solving skills, analytical abilities and innovative ideas, and thus presented a business strategy to take the project forward.
- The competition consisted of two rounds:
 - 1) Prelims(online): Abstract submissions on unstop
 - 2) Finals(offline): held in Room AS3 on 5th April at 2:30 pm
- The Theme was “‘No Poverty’ and Any Other Two SDGs”
- All the event publicity was done through online modes on platforms such as Instagram, Facebook and LinkedIn.
- We received 52 registrations for the competition. A total of 15 students were shortlisted after the prelims for the final round. They were then called for the final which was held offline within the college campus where they had to present their project.
- We chose one winning proposal after careful consideration and deliberations with all Enactus team members.

TABDEEL

From Stubble to Shrooms: Growing a sustainable

Fungi Thrive on Stubble

- Mushroom cultivation is becoming increasingly popular among farmers. Not only does it offer a new stream of income, but it also has a positive impact on the environment by utilizing agricultural waste as a substrate for growth.
- The cultivation of mushrooms is also relatively easy and requires minimal resources, making it an accessible option for farmers with limited land or financial resources.

Cultivating Mushrooms from Stubble

Mushroom Cultivation

- Mushroom cultivation from stubble involves using the agricultural waste left after harvesting as a substrate for growing mushrooms.
- The stubble is chopped, mixed with other organic materials, and then sterilized before being inoculated with mushroom spores.
- Mushrooms are then grown on this substrate, providing a sustainable and profitable alternative for farmers.

Enactus Orientation with First-Year Junior Members

Enactus, St. Stephen's College, organized its society Orientation on **19th September 2023**. It was held in **the AV Room from 2-4 pm**. The orientation was held to introduce the first-year junior members to our society. We told them about Enactus, what it stands for, how we work and about our past projects as well as future plans. The orientation was attended by 20-25 people.

After the Orientation, a fun treasure hunt was also organized for the people who attended the orientation.

All the people were divided into teams of three. 7 teams were formed.

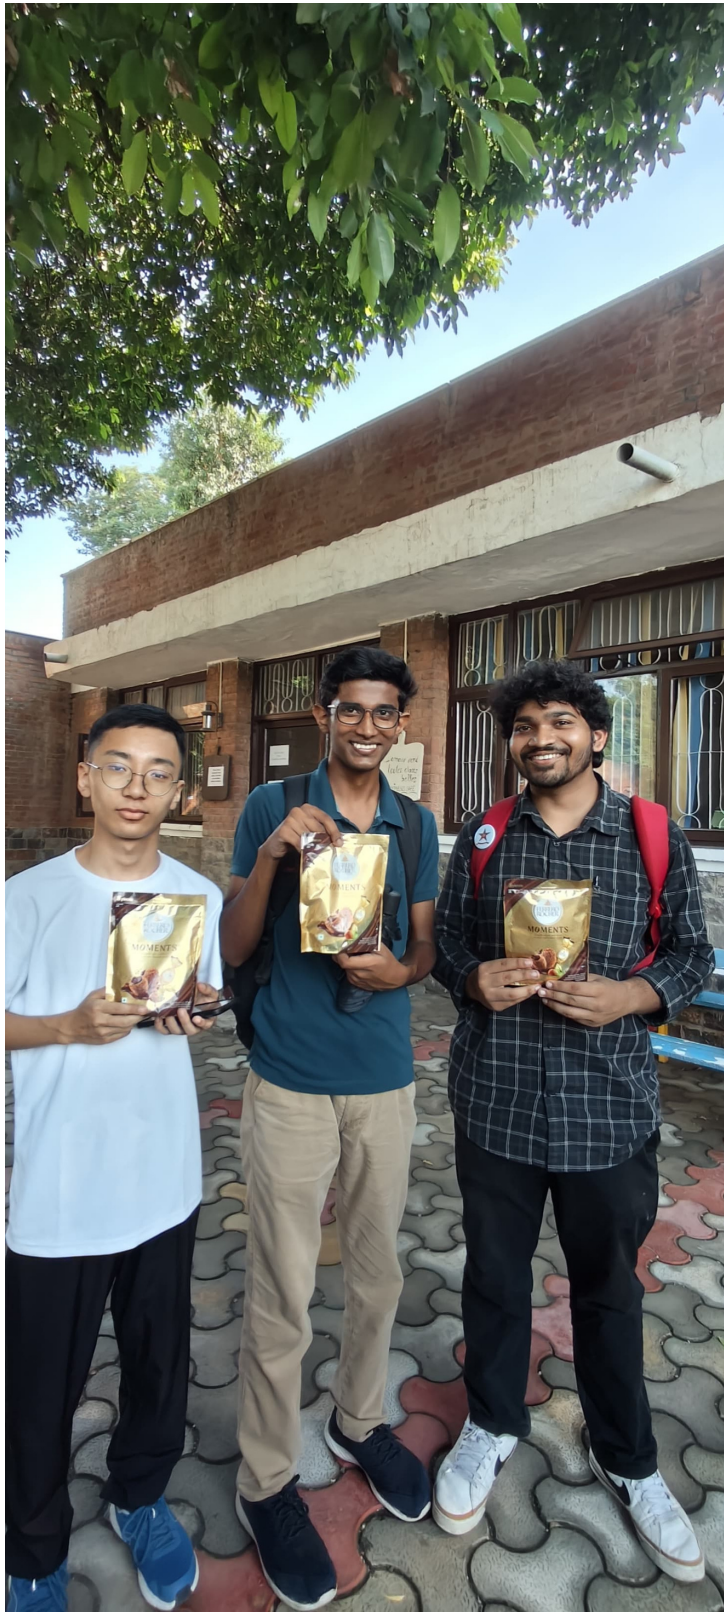

They were given questions and QR codes to scan which would lead them to a password protected pdf. The answer to the question would be the password of the pdf and would provide them with the college map, telling them about the location of the next clue.

The winners were given a shoutout and were rewarded.

The treasure hunt was enjoyed by all the participants and made them learn more about the college as well as the entrepreneurship-related questions being very informative for them.

The orientation along with the treasure hunt ended up with the first-year junior members being familiarized with what Enactus does and what Enactus stands for. Both the orientation and Treasure hunt went smoothly and were successful events.

- The filtered samples are now in the process of testing.

We expect to impact 40 members of the community directly, 200 indirectly and even more when the project is made self-sufficient.

- The project targets a wide demographic of various ethnicities and religions.
